Chennai,Tamil Nadu, India

SUMMARY

Detail-oriented individual with a strong foundation in Python, SQL, and data visualization. Skilled in data cleaning, analysis, and building interactive dashboards using Power BI and Excel. Experienced in working with real-world datasets, improving data accuracy and deriving actionable insights through projects.

EDUCATION

- **K. RAMAKRISHNAN COLLEGE OF TECHNOLOGY** *2021 - 2025*
  B. Tech (Artificial intelligence and data science) Tiruchirappalli
- **BRINDHAVAN HIGHER SECONDARY SCHOOL** *2020 - 2021*
  Higher secondary Education Pattukkottai
- **BRINDHAVAN HIGHER SECONDARY SCHOOL** *2018 - 2019*
  Secondary Education Pattukkottai

EXPERIENCE

I-ZEN (2025)
Machine Learning Intern

- Cleaned and transformed unstructured student performance data to improve data quality and analysis accuracy. Applied data preprocessing and cleaning techniques to structure data and improve analysis accuracy.
- Applied machine learning algorithms (Random Forest, Decision Trees) to improve prediction accuracy by ~15%. Implemented machine learning algorithms like Random Forest and Decision Trees to improve model performance.

PROJECTS

1) **Traffic Data Analysis**

- Performed Exploratory Data Analysis (EDA) on traffic dataset to identify patterns and generate actionable business insights.
- Developed Power BI dashboard to visualize key metrics and support decision making. Built predictive models to forecast traffic flow and improve planning strategies. Processed and cleaned data using Pandas and NumPy for accurate analysis.

2) **Home automation using gesture recognition for disabled person**

- Developed a Python-based gesture recognition system to enable home automation for physically challenged users.
- Optimized data handling and processing to improve system performance and accuracy.

3) **Synthetic Data Generation Using GAN**

- Developed a Flask-based application to generate synthetic datasets using GAN models. Implemented backend logic for data processing and model integration.
- Utilized Pandas and NumPy for efficient data handling and preprocessing. Improved data quality and availability for testing and analysis using generated datasets.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib
- **Data Analysis:** Data Cleaning, EDA, Statistical Analysis, Data Interpretation, Data Modeling
- **Visualization:** Power BI, Excel (Pivot Tables, VLOOKUP, Dashboard Development)
- **SQL Skills:** Joins, Aggregations, Subqueries
- **Tools:** Git, Jupyter Notebook

CERTIFICATIONS

- Python – Upgrad
- Deep Learning – Upgrad
- Data Structures and Algorithms – Upgrad
- Database Management Systems – Upgrad
- Search Engine Optimization – Coursera

LANGUAGES

Tamil, English.
